EGYPT LIVEABOARD ROUTES BY SEASON

Enough to understand:
when to go, which route to choose — and why.

No guesswork.

Made with GAMMA

Winter Season: January–February

Water Temperature

22-23°C

5–7 mm wetsuit

Recommended Routes

North + wrecks

- Thistlegorm
- Abu Nuhas

Season Notes: Colder. Fewer people. Lowest prices.
Best time for wreck diving.

Spring Start: March–April

Temperature

23–25°C — water starts warming up
Comfortable in a 5-7 mm wetsuit

Routes

Northern reefs + light south
Ras Mohammed and first trips to St. John's

Advantages

Excellent visibility (up to 40 m)
Minimal traffic
Great conditions for photography

Made with GAMMA

Comfort Season: May–June

Ideal diving conditions

25–27°C water
3-5 mm wetsuit.
Shorty or even no wetsuit for experienced divers

Northern wrecks

Thistlegorm, Abu Nuhas — excellent visibility for wreck exploration

Southern reefs

St. John's, Fury Shoals — rich coral gardens and abundant marine life

Peak Season: July–August

Temperature	Top routes	Marine life
27-29°C	**Brothers, Daedalus, Elphinstone**	**Hammerhead sharks**
Warmest water of the year	Legendary dive sites	Peak activity

⚠ **Important:** Advanced routes. Strong currents and deeper dives. For experienced divers (Advanced Open Water or higher).

Made with GAMMA

Golden Season: September–October

Best time of the year !

27-28°C

Water temperature

Ideal balance of warmth

100%

Route availability

All directions open

September–October offers the best balance of warm water, excellent visibility, and full access to all routes — from historic wrecks to offshore reefs like Brothers and Daedalus with their iconic sharks.

Calm Season: November–December

Temperature

24–26°C — water starts cooling but remains comfortable for longer dives

Routes

North & Wrecks — main choice. **BDE** reefs — more advanced

Advantages

Calmer conditions
Better prices
Fewer divers on sites

Made with GAMMA
